KIROLLOS NAGEH GAPRAH

Flutter Developer

Portfolio • kirollos.nageh1@gmail.com • LinkedIn • GitHub • 01065623881 • Cairo, Egypt

PROFILE

Flutter Developer with hands-on experience shipping +30 cross-platform apps spanning e-commerce, fintech-style ticketing, real-time chat, and POS systems. Comfortable owning a feature end-to-end — from Clean Architecture design and state management (GetX, BLoC, Riverpod) to Firebase/REST backend integration and testing. Known for writing maintainable code, refactoring legacy systems, and shipping on time in fast-paced teams.

TECHNICAL SKILLS

- **Languages & Frameworks:** Dart, Flutter, Kotlin, Java, Android, OOP
- **Architecture & State Management:** Clean Architecture, MVC, MVVM, GetX, BLoC, Riverpod
- **Backend & Data:** Firebase (Auth, Firestore, Storage, Realtime DB), REST APIs, WebSockets, PHP, MySQL, C#, ASP.NET Core Web API, Entity Framework Core, SQL Server
- **Payments & Integrations:** Stripe, Zoom API, QR code generation/scanning, Social Auth (Google, Facebook)
- **Testing & Tools:** Unit, Widget & Integration Testing, Git/GitHub, CI-friendly workflows

EXPERIENCE

Flutter Developer — WE MISC Sep 2026 – Present

- Developed the WhatsApp Campaign Manager end-to-end — Flutter mobile app and Node.js backend — covering campaign creation, scheduling, data synchronization, and campaign history.
- Integrated the Flutter client with a Node.js messaging layer to connect WhatsApp accounts and send campaigns without relying on Meta's paid Business API.
- Built core modules of Aqar CRM, a bilingual (Arabic/English) real estate sales app — authentication, leads, clients, dashboard, and settings — using Clean Architecture (MVC).

Junior Flutter Developer — ANMKA Feb 2026 – Aug 2026

- Built and shipped 6 production Flutter apps (Elite Pharma, Samurai, Dream Academy, Creations, Le Petit, Micro POS) across e-commerce, e-learning, and POS domains.
- Implemented real-time features — WebSocket-based chat and Firebase authentication/data sync — to support instant communication and live updates.
- Refactored a legacy POS codebase, migrating deprecated dependencies and removing technical debt to improve stability and long-term maintainability.
- Optimized API call patterns and data-fetch logic, cutting unnecessary requests and reducing app load times.

Mobile App Developer Intern — DEPI (Software Development track) Jun 2024 – Nov 2024

- Trained in mobile app development fundamentals with Flutter, contributing to guided projects under senior mentorship as part of a structured software development program.

FEATURED PROJECTS

Full-Stack E-Commerce Solution | *End-to-End E-Commerce Ecosystem*

- Engineered a complete single-vendor ecosystem — customer app, delivery agent app, and a Flutter Web/Desktop admin dashboard — for order tracking and inventory management.
- Architected and deployed the entire backend from scratch (PHP + MySQL) with Clean Architecture and GetX, powering secure, centralized API communication across all clients.

  GitHub

Tazkartak | *Smart Transit Ticketing & QR Access Solution*

- Built a digital metro ticketing app replacing physical subscription cards with dynamic, machine-readable QR codes to reduce station congestion.
- Integrated Stripe for secure payments and Firebase for real-time authentication and data management, using a hybrid MVVM Clean Architecture.

[WeMisc] WhatsApp Campaign Manager | *Campaign Automation & Scheduling Platform*

- Built a Flutter mobile app with a Node.js backend for creating, scheduling, and tracking WhatsApp campaigns, including data synchronization and full campaign history.
- Integrated the Baileys Node.js library with WhatsApp Web via Chromium-based automation to connect WhatsApp accounts and send messages without Meta's paid WhatsApp Business API. Demo

[WeMisc] Aqar CRM | *Real Estate Sales & Lead Management System*

- Developed a CRM app for sales teams at real estate development and marketing companies, covering lead and client management, status tracking, and sales follow-ups.
- Implemented real estate project and property unit management together with installment plan management.

[ANMKA] Micro POS | *Point of Sale & Merchant Accounting System*

- Led an architectural overhaul of a legacy POS app, eliminating technical debt from multiple prior developers and modernizing deprecated dependencies.
- Stabilized business logic for merchant accounting, automated invoicing, and financial reporting without disrupting live operations.

  Google Play

[ANMKA] Elite Pharma | *Pharma Community & Learning App*

- Built a community platform for pharmaceutical professionals with a learning system, job postings, and real-time WebSocket-based chat.

  Google Play

ADDITIONAL PROJECTS

- **[ANMKA] ECSE —** Educational platform for an Egyptian association supporting children with epilepsy, providing students and parents with access to educational content, learning progress tracking, and communication with teachers and educational centers. Google Play
- **[ANMKA] Dream Academy —** Live Arabic tutoring platform with role-based teacher dashboard and Zoom API integration. Google Play
- **[ANMKA] Creations —** Full UI rebrand and performance optimization of an educational app; reduced load times via leaner API calls. . Google Play
- **[ANMKA] Le Petit —** E-learning platform for Francophone schools with quizzes, assignments, and a progress-tracking dashboard. . Google Play

EDUCATION

Bachelor of Computer Science — Modern Academy (MAM), Cairo

2021 – 2025

LANGUAGES

Arabic (Native) • English (Professional)
